MonoSol LLC Signs Vender Business Agreement to Supply Water Soluble Products to United States Federal Agencies

January 31, 2005 - MonoSol LLC, the world leader in developing and commercializing specialty water-soluble polymer-based films, today announced that they have signed a Vender Business Agreement with VSE Corporation, a prime contractor under the U.S. Army Communications-Electronics Command (CECOM) Rapid Response (R2) Program. With this Vender Business Agreement in place, MonoSol can now quickly supply its innovative products to U.S. government managers with a streamlined acquisition process.

The agreement enhances the ability to offer MonoSol's unique water-soluble products such as unit dose packaging films, laundry bags and dust palliative solutions. Packaging detergents and other chemicals in unit-doses of water-soluble films in which the package completely dissolves, reduces the environmental impact of packaging and improves safe handling. Water soluble laundry bags help control infection by limiting human contact with soiled linens that are potentially contaminated with disease. Dust palliative products improve the safety of personnel at airfields and helipads and other locations by reducing brown-out conditions.

"At MonoSol, we're focused on making the world a safer place. To this end, we don't just sell water soluble films - we drive industry innovation and provide total solutions," noted P. Scott Bening, CEO of MonoSol LLC. "By partnering with VSE, we have opened new doors to offer some very practical solutions to some very serious challenges."

About VSE Corp. VSE Corporation (VSE) is an ISO 9001:2000-registered professional services company founded in 1959. For 46 years, VSE has successfully supported all branches of the DoD with core competencies in program management, R&D, systems engineering and integration, technology insertion, hardware/software engineering, test and evaluation (T&E), technical data management, and global logistics across the United States and around the world. For more information on VSE services and products, please see the Company's web site at www.vsecorp.com or contact Len Goldstein, Director of Business and New Product Development at (703) 317-5202.
