

For Immediate Release:

## **MonoSol LLC Acquires Greensol**

March 22, 2006 – MonoSol LLC, the world leader in developing and commercializing specialty water soluble films, announces the acquisition of Greensol S.A., based in Sens, France. Greensol has more than 30 years' experience marketing, developing and packaging with water soluble films. Ines Naude-Filonniere, Greensol's President will work with MonoSol on creative marketing initiatives, and Laurent Colliot, Greensol's Sales Manager joins MonoSol as Regional Sales Manager.

The acquisition reinforces MonoSol's leadership position by strengthening its presence in Europe and by expanding its resources to develop new products and new applications for water soluble films.

“MonoSol and Greensol have collaborated closely as marketing and development partners for many years. We see this merger as a natural evolution of our partnership,” noted P. Scott Bening, CEO of MonoSol LLC. “With the addition of this talented staff to the MonoSol team and with an added base of operations on the continent, we have strengthened our already formidable presence in Europe.”

“We have a long history developing successful commercial applications for water soluble films. The packaging of detergents in PVOH unit-doses is just one example – this format now accounts for more than 15 percent of the European detergent market,” noted Laurent Colliot. “Now, with MonoSol's vision and expertise supporting our activities, we're even better positioned to drive the next generation of innovation in this industry. For example, we see tremendous market potential for MonoSol's newest developments: M-8900 Acid Resistant Water Soluble packaging film and F-100 Edible packaging film for ingredient dosing.”

Made of FDA-approved ingredients, MonoSol engineered the new F-100 film for unit-dose packaging of dry ingredients used in mixing and batching operations within the food processing industry. Packaging flavors, colorants/dyes, enzymes, vitamin fortifiers, conditioners, yeasts and other ingredients in unit-doses with the F-100 Edible-Ingredient packaging film enhances convenience and improves the accuracy of the mixing operation.

please see page two

The M-8900 film has been introduced to answer the long sought after acid resistance required for aggressive cleaning compounds, chemicals and agricultural chemical packaging.

**About MonoSol LLC**

Since 1953, MonoSol LLC has been the world leader in specialty water-soluble polymer-based films. Today, MonoSol offers a wide range of water-soluble packaging films, mold-release films, transfer printing, embroidery support films, water-soluble laundry bags and unique laminated and coated soluble films custom designed for environmentally friendly packaging and disposable systems. MonoSol LLC maintains a global network of dedicated partners to offer sales, service and technical support to its worldwide customer base. Certified ISO 9001:2000, MonoSol maintains the highest quality standards.
